

Q4. Which instrument should be used for Liposome/Exosome/Polymer samples?

A4. For these types of samples, cryo-grids will be prepared by using Vitrobot, then it is recommended to collect data by CEM2-TF20. Before booking online and for a better communication, please read instructions on the ASCEM website first and then contact staff at (02)2787-2572.

- When booking online, submit a case application via “Service Request”, not “Reservation”.
